Why work for PetroSA?

PetroSA continues to play an instrumental role in the country's transformation through a range of activities that span the petroleum chain. Starting with the exploration and production of oil and natural gas, we sell petrochemical products to South Africa's major oil companies and export petrochemical products to the international markets.

Our talent for innovation is recognised globally. In 1992, we started operating the world's first gas-to-liquid (GTL) refinery at Mossel Bay. It remains the third largest GTL refinery among the five now operating worldwide. Here, our specialist teams produce some of the cleanest fuels on the market using some of the most environmentally friendly processes ever developed.
